I have data to support the above surface water use reductions due to conservation efforts. YES  NO

**MAY 4 2006**

*[Signature]*

The above discussion is provided for general information. For more specific information concerning water rights, please contact an attorney or write to this office.

We have several pamphlets available. They include: (1) Statements of Water Division and Use, (2) Information Pertaining to Water Rights in California, and (3) Application of Water in California.

Statements of Water Division and Use must be filed by riparian and pre-1914 appropriative water users as set forth in Water Code section 5100 with specific exceptions. The filing of a statement (1) provides a record of water use, (2) enables the State to notify such users if someone proposes a new appropriation from their divisions, and (3) assists the State to determine if additional water is available for future appropriators.

There is a surplus not needed by riparian water users. Since 1914, new appropriators have been required to obtain a permit and license from the State. An appropriate right is required for use of water on non-riparian land and for storage of water. Generally, appropriate rights may be exercised only when

appropriative rights can be granted to waters "foreign" to the natural stream system. There is a surplus not needed by riparian water users. Since 1914, new appropriators have been required to obtain a permit and license from the State. An appropriate right enables an owner of land bordering a natural lake or stream to take and use water on his riparian land. Riparian land must be in the same

flow from use of groundwater, or other "foreign" water to the natural stream system.

There are two principal types of surface water rights in California. They are riparian and appropriative rights.

See back of page for General Information. If there is insufficient space for your answers,  
please number them in the space provided on the back of this form.

There are two principal types of surface water rights in California. They are riparian and appropriative rights.

#### GENERAL INFORMATION PERTAINING TO WATER RIGHTS IN CALIFORNIA

A riparian right enables an owner of land bordering a natural lake or stream to take and use water from his riparian land. Riparian land must be in the same water shed as the water source and must never have been severed from the sources of supply by an intervening parcel without reservation of the riparian right to the severed parcel. Generally, a riparian water user must share the water supply with other riparian users. Riparian rights may be used to divert the natural flow of a stream but may not be used to store water for later use or to divert water which originates in a different watershed, or return flows from use of ground water.

An appropriative right is required for use of water on nonriparian land and for storage of water. Generally, appropriative rights may be exercised only when there is a surplus not needed by riparian water users. Since 1914 new appropriators have been required to obtain a permit and license from the State.

Statements of Water Diversion and Use must be filed by a riparian and pre-1914 appropriative water users. The filing of a statement from their diversion, and (3) assists the State to determine if additional water is available for future appropriators.

The above discussion is provided for general information. For more specific information concerning water rights, please contact an attorney or write to this office. We have several pamphlets available. They include:

- "Statement of Water Diversion and Use"
- "Information Pertaining to Water Rights in California"
- "Water Rights for Stockponds Granted Prior to 1903"

James D. Knob

A riparian right enables an owner of land bordering a natural lake or stream to take and use water on his riparian land. Riparian land must be in the same watershed as the water source and must never have been severed from the source of supply by an intervening parcel without reservation of the riparian right to the severed parcel. Generally, a riparian user must share the water supply with other riparian users. Riparian rights may be used to divert the natural flow of a stream but may not be used to store water for later use or to divert water which originates in a different watershed, or return flows from use of groundwater.

An appropriate right is required for use of water on nonriparian land and for storage of water. Generally, appropriate rights may be exercised only when there is a surplus use, (2) enables the State to notify such users if someone proposes a new appropriation use, (2) enables the State to notify such users if someone proposes a new appropriation from their diversion, and (3) assists the State to determine if additional upstream from their diversion, and (3) assists the State to determine if additional diversion concerning water rights, please contact an attorney or write to this office. We have several pamphlets available. They include:

"Statement of Water Diversions and Use",  
"Information Pertaining to Water Rights in California",  
"Water Rights for Stockponds Constructed Prior to 1969",  
"Appropriation of Water in California",  
and "Diversions of Water".

The above discussion is provided for general information. For more specific information concerning water rights, please contact an attorney or write to this office. We have

There are two principal types of surface water rights in California. They are riparian and appropriative rights.

STATEMENT OF WATER DIVERSION AND USE

This statement should be typewritten or legibly written in ink.

A. Name of person diverting water

D. R. Knob

Address

2424 Fall River Mills 96028

B. Name of body of water at point of diversion

Fall River

Tributary to

Fall River

C. Place of diversion

at Ranch

1/4 1/4 Section

Township 37N, Range 5E, B&M,

County, or locate it on sketch of section grid on reverse side with regard to section lines or prominent local landmarks.

town of Fall River Mills

D. Name of works

E. Capacity of diversion works

not known

cubic feet per second

Capacity of storage reservoir

none

gallons per minute

State quantity of water used each month in gallons or acre-feet

Year	Jan.	Feb.	Mar.	Apr.	May	June	July	Aug.	Sept.	Oct.	Nov.	Dec.	Total	Annual
:	:	:	:	:	:	:	:	:	:	:	:	:	:	:

If monthly and annual use are not known, check months in which water was used. State extent of use in units, such as acres of each crop irrigated, average number of persons served, number of stock watered, etc.

about 800 acre irrigated

Maximum annual water use in recent years

not known

gallons

Minimum annual water use in recent years

not known

acre-feet

Type of diversion facility: gravity

, pump

gallons

Method of measurement: weir

, flume

, electric power meter

, water meter

estimate

F. Purpose of use (what water is being used for)

Irrigation + Livestock Water

G. General description or location of place of use (use sketch of section grid on reverse side if you desire)

Ranch joining Fall River Mills

H. Year of first use as nearly as known

1989 or there

I. Name of person filing statement

Noel Knob

Position

Manager

Organization

D.R. Knob & Son

Address

2424 Fall River Mills

I certify that the foregoing statements are true and correct to the best of my knowledge and belief.
